Call (501) 364-4000 to refer a patient.
As the only children’s hospital in Arkansas, we are designed with children in mind. The ENT Clinic at Arkansas Children’s specializes in the unique needs of children.

The ENT Clinic at ACH treats children of all ages for common problems such as:

- Ear infections (otitis media)
- Sinusitis
- Breathing problems, such as airway subglottic stenosis
- Feeding and swallowing disorders
- Hearing loss
- Speech problems
- Language development
- Sleep apnea

- Congenital abnormalities, such as:
  - Cleft lip and palate
  - Laryngomalacia
  - Neck masses
  - Vascular malformations
  - And many other types of ENT conditions

Now offering a fast-track program for patients meeting certain surgical guidelines.

Based on existing surgical efficiency models, the ENT team at Arkansas Children’s has developed a fast-track program in order to reduce wait times for certain surgical candidates.

We offer patients having common ENT procedures a service to help reduce wait times or delays.

1) **Our team will inform the family if their child is a candidate**
2) **The parent requests the next available time at checkout**
3) **We’ll handle the rest!**

Your patient will receive focused attention from one of our attending surgeons - pediatric otolaryngologists.

To refer a patient, please call (501) 364-4000 and ask for ENT.
